

2022-2023

19EI501- Automatic Control Systems

Participative Learning

Objectives:

To enhance students understanding of control theory and its practical applications by actively engaging them in the learning process. Participative learning methods encourage students to actively participate, collaborate, and apply their knowledge, fostering a deeper comprehension of complex control system concepts.

19EI702 -Industrial Data Networks

Group Learning

Objectives:

To Studying Industrial Data Networks through group learning is to foster a collaborative and interactive environment that enhances students' understanding of data network technologies in industrial settings. Group learning encourages active participation, knowledge sharing, and problem-solving, leading to a more comprehensive comprehension of complex concepts
